

Codex Task Instructions – M6.2.1 Part D

You are working inside this folder:

Module6/M6.2.1/PartD

Your job is to complete the assignment using the provided documents and place the finished output inside the **submit** folder.

IMPORTANT RULES

1. NEVER modify the original template files in the root folder.
2. ALWAYS work only on copies inside the **submit** folder.
3. NEVER modify these reference files:
 - Minor Works Contract.docx
 - Well street Drawings and specifications.pdf
 - Module 6 - Project Task 2.1 - Managing Subcontractor Requirements (Part D).pdf
 - .srt or .mp4 files

These files are **reference only** and must not be edited.

FILES THAT MUST BE COMPLETED

Only the following files must be edited:

- Post Project Safety Review Form.docx
- M6_Cover_Assessment 2.1 Part D_V1.1.docx

Do NOT rename these files.

STEP 1 – PREPARE SUBMISSION WORKSPACE

If the **submit** folder does not exist, create it.

Copy the following templates into the **submit** folder:

- Post Project Safety Review Form.docx
- M6_Cover_Assessment 2.1 Part D_V1.1.docx

All edits must be done inside the **submit** folder.

Do NOT modify the original templates in the root folder.

STEP 2 – REVIEW PROJECT DOCUMENTS

Read the following files to understand the project and subcontractor performance:

- Module 6 - Project Task 2.1 - Managing Subcontractor Requirements (Part D).pdf
- Minor Works Contract.docx
- Well street Drawings and specifications.pdf

Understand that:

- The project is the Well Street construction project
 - John Smith is the subcontractor being evaluated
 - You monitored his performance during the project
 - You must complete a post-project safety performance review
-

STEP 3 – UNDERSTAND THE OBJECTIVE

The objective of this task is to demonstrate the ability to:

- monitor subcontractor safety compliance
- review contractor performance after project completion
- evaluate WHS documentation compliance
- identify areas for improvement in subcontractor management

You must complete the Post Project Safety Review Form based on the provided project information.

STEP 4 – PROJECT PERFORMANCE INFORMATION

During the project you monitored John Smith and observed the following:

John attended the site induction.

Only 20 pre-start checklists were submitted.

There should have been 40 pre-start checklists.

All housekeeping checklists were submitted as required.

Incident reports were all submitted.

JSA's were completed for all jobs.

John attended all safety meetings.

Use this information to complete the Post Project Safety Review Form.

STEP 5 – COMPLETE THE SAFETY REVIEW FORM

Open:

submit/Post Project Safety Review Form.docx

Complete the Safety KPI sections using the provided performance information.

STEP 6 – CONTRACTOR PERFORMANCE RATING

Select:

Acceptable

Reason:

The contractor complied with most safety requirements, however pre-start checklist submission was incomplete.

STEP 7 – CONTRACTOR RECOMMENDATION

Select:

Yes

Explanation:

Despite minor documentation issues, the contractor demonstrated acceptable safety compliance overall.

STEP 8 – COMPLETE REVIEW DETAILS

Fill the following fields in the safety review form:

- Project
- Contractor
- Project Manager / Safety Manager
- Date of Review

Leave signature fields if not required.

STEP 9 – COMPLETE THE COVER SHEET

Open:

submit/M6_Cover_Assessment 2.1 Part D_V1.1.docx

Fill in:

- Student Name
- Student Signature
- Date

Leave the trainer/assessor section blank.

STEP 10 – VERIFY SUBMISSION

Ensure the **submit** folder contains:

- Post Project Safety Review Form.docx
-

- M6_Cover_Assessment 2.1 Part D_V1.1.docx

Verify that:

- all safety KPI fields are completed
 - explanations and improvements are provided
 - student declaration is completed
 - formatting is readable
-

FINAL GOAL

Produce the completed assessment documents inside the **submit** folder ready for submission to the LMS.
